ABSTRACT

Agricultural Marketplace Platform

The Agricultural Marketplace Platform is a digital solution designed to connect farmers directly with consumers, retailers, and wholesalers, eliminating the need for intermediaries. In traditional agricultural systems, farmers often face challenges such as low profit margins, lack of market access, and price exploitation by middlemen. This platform aims to address these issues by providing a transparent and efficient online marketplace.

The system enables farmers to register, list their products, and set prices based on market demand. Buyers can browse available products, compare prices, and place orders through an easy-to-use interface. The platform also integrates secure payment gateways to ensure safe and reliable transactions between users. Additionally, the system includes logistics support features such as order tracking, delivery scheduling, and supply chain management to ensure timely delivery of goods. Real-time notifications and updates help both farmers and buyers stay informed about order status and market trends.

By leveraging modern web and mobile technologies, the Agricultural Marketplace Platform improves farmers' income, enhances market accessibility, and promotes fair trade practices. It also contributes to the development of a sustainable agricultural ecosystem by empowering farmers and ensuring better price transparency

TEAM DETAILS

TEAM NAME:Team Pheonix

TEAM	NAME	Year of study	College/ University	Contact number
LEADER	Nandhana M K	II	Velalar College of Engineering and Technology	8438566818
MEMBER 1	Manusree M	II	Velalar College of Engineering and Technology	8870356118
MEMBER 2	kaniska K R	II	Velalar College of Engineering and Technology	6385581468
MEMBER 3	Pranitha M	II	Velalar College of Engineering and Technology	9976209291
MEMBER 4	Gunarithan iya T	III	Velalar College of Engineering and Technology	9578443672
