The Need for Scalable Blockchain Platforms

Legacy Challenges

- Network congestion
- High gas fees
- Limited throughput

Growing Demand

- Speed
- Flexibility
- Scalability

Solution: Avalanche

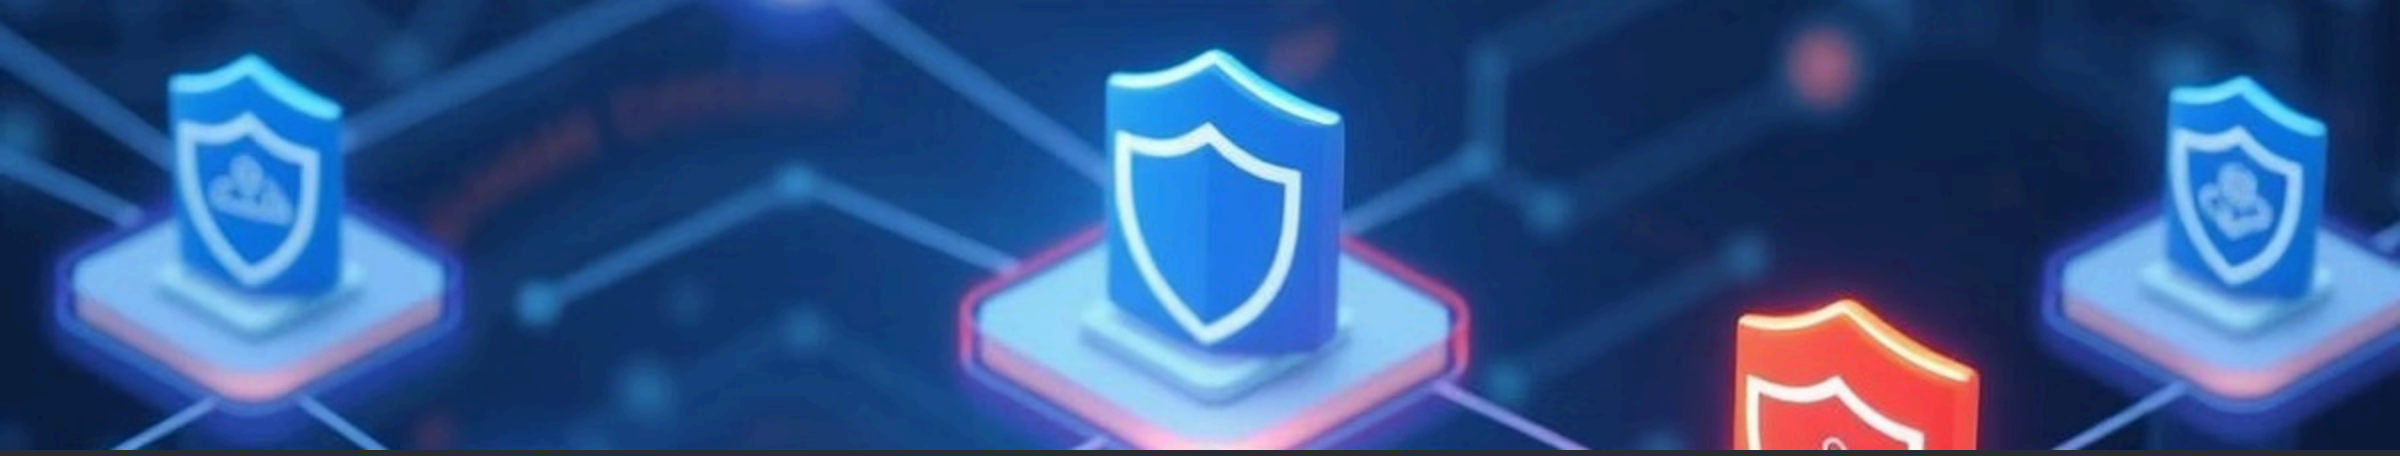
A transformative platform designed to meet modern dApp needs.

Inside Avalanche9s Architecture

X-Chain
Handles asset creation and exchange efficiently.

C-Chain
Supports smart contracts with full EVM compatibility.

P- Chain
Coordinates subnets and manages staking processes.



Subnets 3 Avalanche9s Superpower

Custom ChainsClear Benefits

Subnets enable customizable blockchains with unique rules.

Traffic isolation, compliance features, and network sovereignty.

Real Examples

DFK Chain and Shrapnel subnet powering AAA gaming experiences.

Real-World Use Case 3
Deloitte & Avalanche

Challenge
Paper-based slow FEMA claim processing in disasters.

Partnership
Deloitte built a blockchain platform on Avalanche.

Impact
Transparent records, instant victim data access, fraud reduction.

AVAX Ecosystem Growth

Active dApps & Protocols

- Gaming: Crabada, Shrapnel
- DeFi: Aave, Benqi, Trader Joe
- NFTs: Kalao, NFTrade

Key Metrics

- Billions locked in DeFi
- Increasing daily transactions
- AVAX listed on major exchanges

Final Thoughts

1

Platform Beyond Speed
Supports secure, scalable, custom dApp deployment at scale.

2

Looking Ahead
Introducing cross-subnet communication with Warp Messaging.

3

Expansion Plans
Continued growth in DeFi and GameFi sectors worldwide.

Quote: <Avalanche is building the internet of finance.=

THANK YOU
